

RAHUL MIDDHA

Gwalior, Madhya Pradesh 474007 | 626 480 9553 | rahulmiddha@gmail.com

Professional Summary

Skilled ETL professional offering in-depth understanding of securing and leveraging data resources. Accomplished in building brand new systems that meet complex business requirements. Expertise includes Informatica ETL and Oracle Database.

Skills

- **Database Tools:** Oracle, SQL Server, My-SQL
- **ETL Tools:** Informatica, Hadoop
- **Programming Languages:** Python, R, Shell
- **Cloud:** Google Cloud Platform, AWS

Work History

Consultant

Globalsoft Frameworx

Aug 2018 - Current

Bengaluru, Karnataka

Developed pipelines as per ideal data modeling structures making sure that proper security and integrity controls are in place.

- Manage master data in a central repository to give a single authoritative view of information and eliminate costly inefficiencies caused by a data silo.
- Developed multidimensional data models and transformations using the Informatica ETL tool to define relationships between tables and create an optimized data structure.
- Implemented batch data processing pipelines which optimized the distribution, partitioning of high-level data structures.
- Developed applications with Docker to enhance application deployment and control version control.
- Built databases and table structures following Agile architecture methodology for web applications.
- Structured databases using standard normalization techniques to reduce redundancy and improve data integrity.
